Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1891 Excerpt: . to them. A CASE OF HERPES ZOSTER COMPLICATED WITH ERYSIPELAS AND GANGRENE. BY DR. D. E. WETZEL, DENVER. I was summoned to visit this patient on May 3d, 1891. He is a physician aged about 40 years. On entering the patient's chamber I observed at the first glance an eruption occupying the right side of the forehead and extending upward and backward across the crown of the head. The eruption followed exactly the course and distribution of the supra-orbital nerve. To make a diagnosis of herpes zoster was an easy matter, owing to the strict limitation of the peculiar grouped vesicles or remains of vesicles. The patient gave a history of severe neuralgic pain, preceding the eruption about two weeks, with a failure of the general tone. Some six days before I saw the case the skin became inflamed, hot and burning, followed immediately...
