SYNOPSIS OF LINEAR ASSOCIATIVE ALGEBRA A REPORT ON ITS NATURAL DEVELOPMENT AND RESULTS REACHED UP TO THE PRESENT TIME

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 36 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: . . . norm $q, \dots i, \dots r_n$ are primary prime tettariions of norm t , all being of the form 286. Definition. An integral tettariion is primitive if its coordinates have no common divisor other than unity. It is primitive to an integer m when its coordinates are all prime to m . Every primary tettariion is also primitive. 287. Theorem. Let y be a primitive integral tettariion and $N(y) = p_1 a_1 q_1 t$ where $p, q, \dots t$ are the prime factors of $N(y)$. Then y can be decomposed in only one way into the form $y = n_1 n_x i, T_j \cdot e$ where e is a unit tettariion, and $n_1 n_x i$ are prime tettariions of norm p, i, o , are prime tettariions of norm q, r $T_f c$ are prime tettariions of norm t . The product of each l successive factors is primary, where $l = 1, \dots, a(i = 1, n)$ 288. Definition. If a_1, a_2, \dots, a_s are integral tettariions of equal norms $JV(a_i) = N(a_2) = N(a_s)$, and if $a_1 a_2 \dots a_s = W(a_j)$, then these tettariions are semi-conjugate. 289. Theorem. A product of any number of prime tettariions of forms $2du_{eii}$ is a primitive tettariion of the same form if among the factors no s of them are semi-conjugate. 290. Theorem. A product of primary prime tettariions $i t_i n_n$, where $N(n_i) = P_i (l = 1, \dots, n)$ P_i being distinct primes, is always a primitive tettariion. 291. Definition....
