MHD FLOW AND MASS TRANSFER OF A JEFFERY FLUID PAST A POROUS SHEET

VDM Verlag Nov 2010, 2010. Taschenbuch. Book Condition: Neu. 220x150x5 mm. Neuware - This study describes the influence of mass transfer on the steady two-dimensional magnetohydrodynamic (MHD) boundary layer flow of a Jeffery fluid bounded by a stretching sheet. A uniform magnetic field in the presence of chemical reaction is applied. The arising non-linear partial differential equations are reduced to non-linear ordinary differential equations by similarity variables. Similar solutions of velocity and concentration fields are derived by a homotopy analysis...

Reviews

This pdf can be worthy of a study, and a lot better than other. I am quite late in start reading this one, but better then never. You wont truly feel monotony at at any moment of your respective time (that's what catalogues are for regarding in the event you check with me).

Extensive guide! Its such a excellent read. This can be for anyone who statte that there was not a worth looking at. I am just effortlessly will get a satisfaction of looking at a written publication.

-- **Melvin Hettinger**

This book will not be effortless to start on reading through but very exciting to learn. It is amongst the most remarkable book i have got go through. Once you begin to read the book, it is extremely difficult to leave it before concluding.
